 @InvasiveSp

If your garden, pond or aquarium plants spread into the wild they can become invasive and cause great harm to our wildlife, environment, and economy

You can help by following three simple tips:

- KNOW WHAT YOU GROW
- STOP THE SPREAD
- COMPOST WITH CARE

Retailers can order a free kit to help your customers

#BePlantWise to protect the environment!

#Invasiveplants can be carried on the wind or by birds

If you have them in your garden, remove seed heads and pods regularly to prevent this ⚡

Visit [www.nonnativespecies.org/beplantwise](http://www.nonnativespecies.org/beplantwise)  
@InvasiveSp

#BePlantWise to protect the environment!

Take care when giving or accepting cuttings as you could accidentally pass on invasive plants, pests, or plant diseases

If you aren't sure, don't risk it!

Visit [www.nonnativespecies.org/beplantwise](http://www.nonnativespecies.org/beplantwise)  
@InvasiveSp

#BePlantWise to protect the environment!

Help local native plants to flourish by not planting or disposing of garden plants in the wild

Most plants can be composted or put in your green waste bin ♻️

Visit [www.nonnativespecies.org/beplantwise](http://www.nonnativespecies.org/beplantwise)  
@InvasiveSp

#BePlantWise to protect the environment!

If your plants 'jump the fence' and spread into the wild they could become invasive

Keep unfamiliar plants to areas you can keep an eye on them, especially if your garden borders the countryside
