

## **Invasive species detectives - Instructions**

Work through each case one by one

1. There are two questions for the detectives to solve:
  - What caused the problem in the case?
  - How can we stop it happening again?
2. Ask the detectives to read the case, look at the photos and come up with some ideas for each answer. If they are struggling, have a look at the clues.
3. Reveal the options (lines of enquiry) for each case and ask them which is correct, and why.
4. Attach these to the case - case closed!
