

Have you seen this pest?

GIANT AFRICAN LAND SNAIL

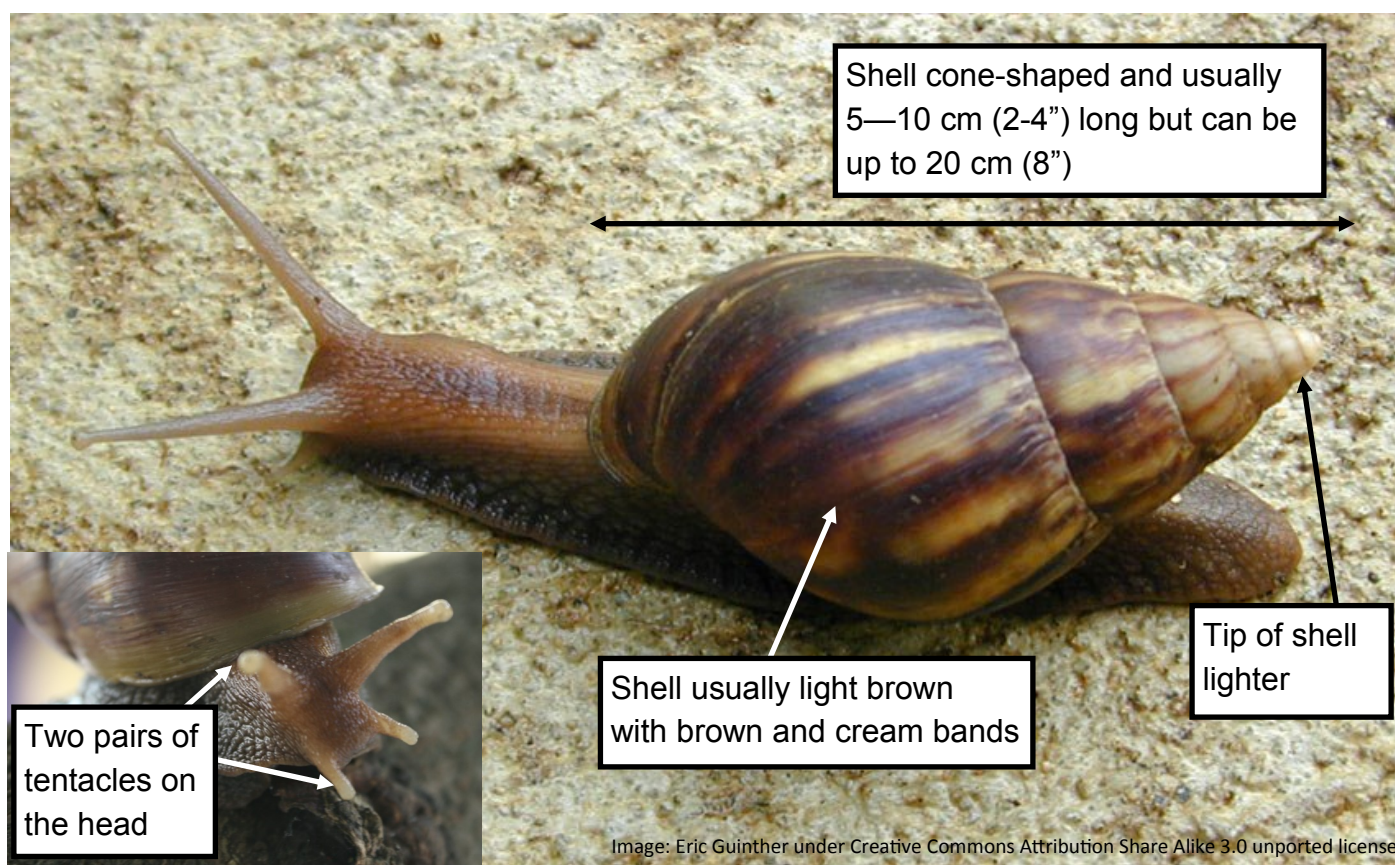

Lissachatina fulica

What is it?

A large invasive snail from East Africa. Giant African land snail is a major plant pest which feeds on a range of important plants including vegetable and food crops.

Suspected sightings should be reported immediately using the details provided at the bottom of this poster.

Where might I see it?

Adult snails hide during the day, coming out at dusk to feed. May be found in agricultural areas, coastland, natural forest, riparian zones, shrublands, urban areas and wetlands.
